Re: Response to Review Request No. 023-18159
Permit status evaluation
Plant ID: 023-00024

Dear Ms. Potter:

On September 22, 2003, the Office of Air Quality (OAQ) received a review request for the construction of an air filter production line at your existing source, located at 3260 W. State Road 28, Frankfort, Indiana 46041. Donaldson Company, Inc. was issued a Part 70 Operating Permit (T 023-8315-00024) on October 24, 2000. The proposed production line will consist of folding air filter media, gluing it, and placing it in a plastic housing. Construction of this line is expected to begin in February 2004.

Sources with the potential to emit any pollutant greater than the following amounts must receive approval from the OAQ prior to beginning construction:

PM₁₀ = < 5 tpy; **SO₂** = < 10 tpy; **NO_x** = < 10 tpy; **VOC** < 10 tpy for sources not required to use air pollution control devices to comply with 328 IAC 8; **VOC** < 5 tpy for sources required to use air pollution control devices to comply with 326 IAC 8; **CO** = < 25 tpy.

Sources with the potential to emit less than the above amounts are exempt from the requirement to apply for, or receive such an approval. If you wish to receive a written determination regarding the need for an approval, then you should submit a permit application and \$100 filing fee to:

Cashier, Indiana Department of Environmental Management
100 North Senate Avenue
P.O. Box 6015
Indianapolis, Indiana 46206-6015

The IDEM, OAQ will then issue a written determination of whether this project needs to be approved prior to construction. If it does, the OAQ will also notify you if any additional fees are required to receive the necessary approval. Lacking a written determination from the OAQ, Donaldson Company, Inc. will assume the burden of demonstrating that this project is exempt if the issue arises in the future.

Donaldson Company, Inc.
Frankfort, Indiana
